EDUCATION

Vishnu Institute of Technology   Bhimavaram, AP
Bachelor of Technology in Computer Science Engineering   *Nov. 2021 – Apr 2025*

Sri Chaitanya College   Eluru, AP
Intermediate MPC   *2019 – 2021*

Sri Bhavishya High School   Eluru, AP
Schooling upto 10th   *2018*

INTERNSHIPS

AICTE Virtual Internship - AIML   July 2023
AWS Academy   *Virtual*
- Engaged in a comprehensive virtual internship program facilitated by the All India Council for Technical Education (AICTE), where I gained hands-on experience in Artificial Intelligence and Machine Learning (AI-ML).
- This internship experience has fortified my understanding of AI-ML concepts and equipped me with practical skills essential for future endeavors in the field.

Full stack web development Internship   Sep. 2023 – oct 2023
Bharat Intern   *Online*
- An engaged participant in a Virtual Internship Program at Bharat Intern in Full stack Web Development
- Developed a video Conferencing website as a part of internship showcasing my skills in web development
- Developed a blog (content management system) website as a part of internship showcasing my skills in web development

PROJECTS

CurioLearn | *Html, Css, Js, Express Js, MongoDB*
- A better version of wikipedia where users can access data including photos based on their search with signup and login functionalities

Chatify | *Tailwind Css, React Js, Express Js, MongoDB*
- A chatting web page where users can seemlessly connect with each other built using react js,tailwind css and used socket io for real time messaging and online status

Recipe website | *React Js,Tailwind Css,react-router-dom*
- An e-cook book for the users to search through an endless pool of recipes built using react-js,tailwind css and used edamame api for retrieving the recipes

Travel website | *React Js,sass,react-dom,aos,react-icons*
- A travel booking website with an immersive UI/UX design created with react js and scss with a responsive design

Netflix clone | *React Js,Css,react-router-dom,Firebase,react-Toastify*
- Developed a Netflix clone using React JS, CSS, react-router-dom, Firebase, and react-Toastify. Implemented features such as user authentication, movie browsing, and toast notifications for enhanced user experience.

Disney+ clone | *React Js,Css,react-router-dom,Firebase,react-Redux*
- I developed a Disney+ clone using React JS, CSS, react-router-dom, Firebase, and react-Redux, featuring user authentication and dynamic content fetching. The app replicates Disney+'s interface and functionality, providing a seamless streaming experience.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript, HTML/CSS
Frameworks: React, Node.js, Express Js
Developer Tools: Git,VS Code, Visual Studio
Others: MongoDB,Tailwind Css

CERTIFIED COURSES

- sql and python certification from Hackerrank
- Full Stack Web Application Development with Node JS certification through Codinza
- Cloud Foundations certification in Great Learning
- Programming in Java certification awarded by NPTEL
